

# Raken Observations

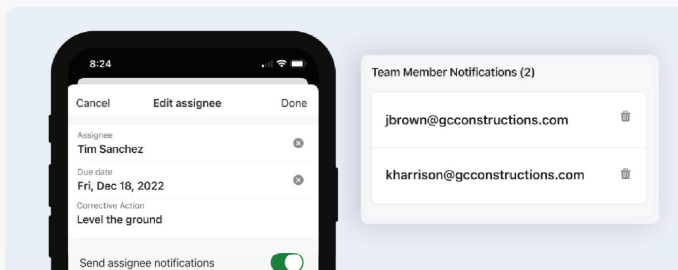

Increase visibility into daily progress and empower your team to maintain safety and quality compliance.

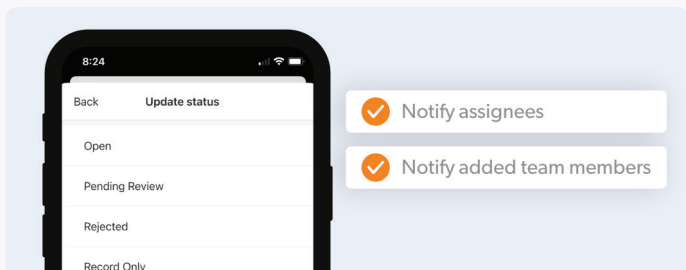

**Prompt field crews to capture detailed safety and quality observations directly or in a scheduled checklist.**

**Teams can mark observations as positive or negative, and add extra details with time and date stamped photos.**

**Assign a crew member or external collaborator to address any issues.**

**Track observation resolution and tag stakeholders for automatic notifications.**

**Analyze safety and quality trends at a glance with real-time dashboards and reporting.**
