# Safety Management

Proactively identify and prevent risks on the jobsite. Our safety tools improve documentation and compliance.

Managed checklists

Schedule, assign, and complete safety checklists. Choose from our library or customize your own.
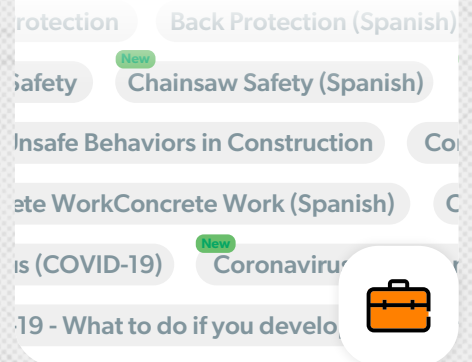

Observations

Submit detailed safety observations in real time and assign employees or subcontractors to address any issues.
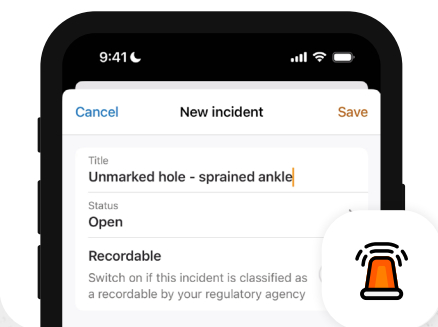

PPE Review

PPE Review Checklist
Use this section to help confirm that all workers are using proper personal protective equipment for all aspects of scope on the project.

1. Are all workers wearing hardhats, glasses, vests, and work boots?

No | N/A

Quality checklist completion

"When I see a Raken report on a project, I can look at the details and determine if there is a hazard that hasn't been addressed clearly."

Tom M., Director of Corporate Safety
